

## How to let extensions work in firefox 2.0

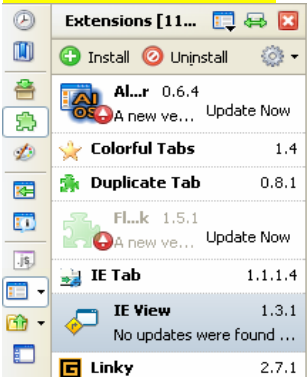

[http://kb.mozillazine.org/Problematic\\_extensions](http://kb.mozillazine.org/Problematic_extensions)

[http://kb.mozillazine.org/Standard\\_diagnostic\\_-\\_Firefox](http://kb.mozillazine.org/Standard_diagnostic_-_Firefox)

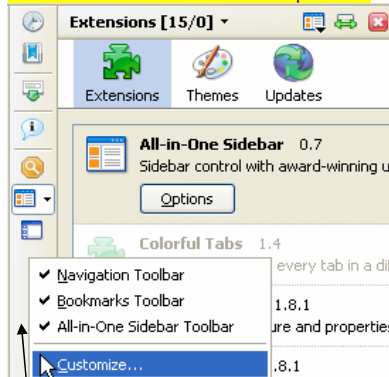

for startup problems

R.v.V 25-10-06

buttons all in onsidebar 0.64

buttons all in one sidebar 0.7 after update

link for all in one side bar  
<http://firefox.exile.net/aio/>  
0.7 is needed for firefox 2

## Beat Internet Explorer

**Spread Firefox!**  
100 million Firefox downloads, first year!

This is a Firefox Flicks video made by a fan of the Firefox web browser.

Title of video: Fox FeverLink to video

<http://www.firefoxflicks.com/flick/?id=21146>

**Customize Toolbar**

You can add or remove items by dragging to or from the toolbars.

for webpage & source in sidepanel

drag these 5 buttons to sidebar

right mouse click on sidebar

after restart change sidebar to small icons

check every day never do this open tab in sidebar click away DON'T enable

in options - choose and restart FF

change to F9, so you can switch the prefbar on/off with F8

To let "old" extensions work in Firefox 2 download Nightly tester Tools extension

<http://users.blueprintit.co.uk/~dave/web/firefox/nightly>

**Nightly Tester Options**

Disable add-on compatibility checking

in options - choose and restart FF

**Extensions [18] - Add-ons**

check every day never do this open tab in sidebar click away DON'T enable

**IE View** 1.3.1

**Linky** 2.7.1

**MileWideBack** 0.2.9

**Nightly Tester Tools** 1.2

Useful tools for the nightly tester.

**Options** **Disable** **Uninstall**

Weer het close tab kruisjes rechts ipv op elke tab

1. In the Address Bar type "about:config" and press Enter.
2. Right-Click and select New->Integer.
3. A box requesting the Preference Name will popup and you should enter "browser.tabs.closeButtons" (without the quotes). Press OK to continue.
4. Now you need to select the type of close button you want: 0 - display a close button on the active tab only, 1 - display close buttons on all tabs, 2 - don't display any close buttons, and 3 - display a single close button at the end of the tab strip (Firefox 1.x behavior). After entering the value corresponding to your preference press OK again. men kan ook : user\_pref("browser.tabs.closeButtons", 3); in prefs.js toevoegen

**Reveal** <http://aluminum.sourmilk.net/reveal/> SEE al pages you were

**Foxpose** <https://addons.mozilla.org/firefox/1457/>
